## ORDER INFORMATION

RVS<sup>Acad</sup> Product description, licensing and purchasing options

# Order information: RVS<sup>Acad</sup>

Rapita **Verification Suite** Acad (RVS<sup>Acad</sup>) is a suite of software verification tools for academic and teaching purposes. We recognize the budget constraints of working in an academic environment; as such, RVS<sup>Acad</sup> is offered at a 90% discount compared to the price of commercial versions of RVS.

A typical configuration of RVS<sup>Acad</sup> includes RVS core and one or more plugins. These are described below:

- **RVS core**: Set of tools common to all RVS products. These tools have support for Ada, C and C++ compilers.
- **RapiTest**: Test management tool for generation and execution of system and unit tests on embedded targets.
- **RapiCover**: Low-overhead structural coverage analysis.
- **RapiCover<sup>Zero</sup>**: Structural coverage analysis directly from object code.
- **RapiTime**: Execution-time measurement and optimization.
- **RapiTime<sup>Zero</sup>**: Execution time analysis directly from object code.
- **RapiTask**: RTOS-independent visualization of scheduling and event-tracing on single or multi-core systems.
- **RapiTask<sup>Zero</sup>**: Visualization of event scheduling directly from object code.

When you buy RVS<sup>Acad</sup>, you receive:

- Electronic access to download the latest version of RVS for your operating system from our Customer portal. Installers include your selected plugins and electronic copies of documentation.
- Electronic access to download the License Server for your operating system.
- Access to support and maintenance for a period of 12 months.
- A USB license key for license management (if required).
- Tutorials and resources for integrating RVS with your target and development environment.

## Integration service

To ensure a robust integration of RVS<sup>Acad</sup> into your development environment, we can provide a target integration service. We offer this separately from the RVS<sup>Acad</sup> tools, as described in our [Target Integration Service Product brief](#).

## Licensing and purchasing

RVS<sup>Acad</sup> is supplied with a **floating license**, which lets multiple people within an organization use RVS<sup>Acad</sup> in a shared environment. Floating licenses follow an "Enterprise" model and can be used across geographical boundaries by different projects and users.

For more detail on how floating licenses work, see our [Software Licensing FAQ](#) or contact us at [info@rapitasystems.com](mailto:info@rapitasystems.com).

**RVS<sup>Acad</sup> licenses can be used for non-commercial research and teaching purposes only.**

## Licensing duration

You can purchase RVS<sup>Acad</sup> with either an **annual** or **perpetual** license.

- **Annual licenses** let you use RVS<sup>Acad</sup> for a number of annual periods. This is useful for projects with shorter durations.
- **Perpetual licenses** let you use RVS<sup>Acad</sup> indefinitely. This supports the use of RVS<sup>Acad</sup> in projects with long life cycles.

You can convert an annual license to a perpetual license at any time while your license is active. Converting a license from annual to perpetual incurs a small fee, plus the purchase of at least a 1 year support and maintenance contract.

## Academic publishing

Rapita Systems began as a spin out from the University of York, has a staff comprising a large percentage of employees with doctorate degrees, and remains involved in a number of research activities. As such, we acknowledge requests for collaboration on research activities. When publishing academic papers that involve the use of RVS<sup>Acad</sup>, we would appreciate that you acknowledge this use.

## Support and maintenance

We include a period of support and maintenance in the purchase price for all **RVS<sup>Acad</sup>** products, providing you with:

- Access to downloads of the latest versions of our tools.
- Physical updates (CDs, manuals) of new major releases.
- Telephone and email access to our support team.

We include support and maintenance for **RVS<sup>Acad</sup>** for a number of years equal to the duration of the license. Each time you renew your license, the support and maintenance period is extended.

If you purchase **RVS<sup>Acad</sup>** with a perpetual license, we include support and maintenance for the first year. After this, you can purchase a Rapita support and maintenance contract separately, covering another year or multiple years in advance. If your support and maintenance was discontinued and you want to renew it, you must purchase the service from the date it was discontinued.

If you purchase **RVS<sup>Acad</sup>** with an annual license, we include support and maintenance for the full duration of the license period. Each time you renew your license, the support and maintenance period is extended.

As long as your license is covered by a support and maintenance contract, you can access the latest version of the tools, all bug fixes and the Rapita support team.

## Frozen version support

If you require it, we can arrange long-life support for a version of our products by freezing the version. We can come to an arrangement and customize our frozen version support package to meet your needs.

## Product codes

The product codes for our **RVS<sup>Acad</sup>** products are shown in Table 1.

**Table 1.** **RVS<sup>Acad</sup>** product codes

Product	License type	Product code		
		License duration		Support and maintenance
		Annual	Perpetual	
RVS Core	Floating	RVSc-acad-F-A	RVSc-acad-F-P	RVSc-acad-F-S
RapiTest		RPF-acad-F-A	RPF-acad-F-P	RPF-acad-F-S
RapiCover		RPC-acad-F-A	RPC-acad-F-P	RPC-acad-F-S
RapiCover <sup>Zero</sup>		RPCZ-acad-F-A	RPCZ-acad-F-P	RPCZ-acad-F-S
RapiTime		RPT-acad-F-A	RPT-acad-F-P	RPT-acad-F-S
RapiTime <sup>Zero</sup>		RPTZ-acad-F-A	RPTZ-acad-F-P	RPTZ-acad-F-S
RapiTask		RPZ-acad-F-A	RPZ-acad-F-P	RPZ-acad-F-S
RapiTask <sup>Zero</sup>		RPZZ-acad-F-A	RPZZ-acad-F-P	RPZZ-acad-F-S

## About Rapita

Rapita Systems provides on-target software verification tools and services globally to the embedded aerospace and automotive electronics industries.

Our solutions help to increase software quality, deliver evidence to meet safety and certification objectives and reduce costs.
